

THANK YOU FOR BUYING A HOTPOINT PRODUCT In order to receive a more complete assistance, please register your product on www.hotpoint.eu/register

Before using the appliance carefully read the Safety Instruction.

PRODUCT DESCRIPTION

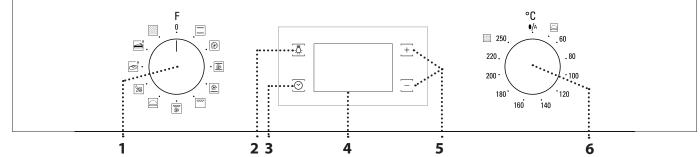

- 1. Control panel
- 2. Fan
- 3. Lamp

4. Runners for accessories (the level is indicated on the wall of the cooking compartment)

ΕN

- 5. Door
- 6. Door lock
 - (locks the door while automatic cleaning is in progress and afterwards)
- 7. Upper heating element/grill
- 8. Circular heating element (not visible)
- **9.** Identification plate (do not remove)
- **10.** Lower heating element (not visible)

CONTROL PANEL

1. SELECTION KNOB

For switching the oven on by selecting a function. Turn to the 0 position to switch the oven off.

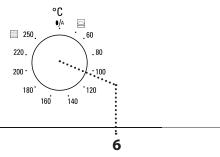

2. LIGHT

With the oven switched on, press to turn the oven compartment lamp on or off.

For accessing the cooking time settings, delayed start and timer. For displaying the time when the oven is off.

4. DISPLAY

5. ADJUSTMENT BUTTONS

For changing the cooking time settings.

6. THERMOSTAT KNOB

Turn to select the temperature you require when activating manual functions. Automatic functions use •/A .

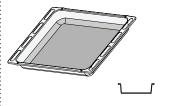

ACCESSORIES

WIRE SHELF

The number of accessories may vary depending on which model is purchased. Other accessories can be purchased separately from the After-sales Service.

INSERTING THE WIRE SHELF AND OTHER ACCESSORIES

. Insert the wire shelf onto the level you require by holding it tilted slightly upwards and resting the raised rear side (pointing upwards) down first. Then slide it horizontally along the runners as far as possible.

FUNCTIONS

CONVENTIONAL*

Www

runners.

Download the Use and Care Guide from www.hotpoint.eu for more information

For cooking any kind of dish on one shelf only.

FORCED AIR

For cooking different foods that require the same cooking temperature on several shelves (maximum three) at the same time. This function can be used to cook different foods without odours being transferred from one food to another.

MAXI COOKING B

For cooking large joints of meat (above 2.5 kg). We recommend turning the meat over during cooking to ensure that both sides brown evenly. We also recommend basting the joint every so often to prevent it from drying out excessively.

PIZZA B

For baking different types and sizes of pizza and bread. It is a good idea to swap the position of the baking trays halfway through cooking.

For grilling steaks, kebabs and sausages, cooking vegetables au gratin or toasting bread. When grilling meat, we recommend using a dripping pan to collect the cooking juices: position the pan on any of the levels below the wire shelf and add 200 ml of drinking water.

D

TURBO GRILL

For roasting large joints of meat (legs, roast beef, chicken). We recommend using a dripping pan to collect the cooking juices: position the pan on any of the levels below the wire shelf and add 200 ml of drinking water.

RISING

 \succeq For helping sweet or savoury dough to rise effectively. Turn the thermostat knob to the icon to activate this function.

. Other accessories, like the baking tray, are to be

inserted horizontally, letting them slide on the

ECO FORCED AIR* æ

For cooking roasts and stuffed roasting joints on a single shelf. Food is prevented from drying out excessively by gentle, intermittent air circulation. When this ECO function is in use, the light will remain switched off during cooking but can be switched on again by pressing \bigcirc .

A BREAD AUTO

3 This function automatically selects the ideal temperature and baking time for bread. For best results, carefully follow the recipe . Activate the function when the oven is cold.

A PASTRY AUTO

This function automatically selects the ideal temperature and baking time for cakes. Activate the function when the oven is cold.

AUTOMATIC CLEANING For eliminating cooking spatters using a cycle at very high temperature.

* Function used as reference for the energy efficiency declaration in accordance with Regulation (EU) No. 65/2014

USING THE APPLIANCE FOR THE FIRST TIME

1. SET THE TIME

You will need to set the time when you switch on the appliance for the first time: Press \bigcirc until the \bigcirc icon and the two digits for the hour start flashing on the display.

Use $\underline{+}$ or $\underline{-}$ to set the hour and press $\underline{\bigcirc}$ to confirm. The two digits for the minutes will start flashing. Use $\underline{+}$ or $\underline{-}$ to set the minutes and press $\underline{\bigcirc}$ to confirm.

Please note: When the \bigodot icon is flashing, for example following lengthy power outages, you will need to reset the time.

2. SET THE POWER CONSUMPTION

The oven is programmed to work at a power of less than 2.9 kW ("Lo"): To operate the oven at a power that is compatible with a domestic power supply of greater than 3 kW ("Hi"), you will need to change the settings.

To go to the change menu, turn the *selection knob* to \Box , then turn it back to **0**.

Press and hold \pm and \pm for five seconds immediately afterwards.

DAILY USE

1. SELECT A FUNCTION

To select a function, turn the *selection knob* to the symbol for the function you require: the display will light up and an audible signal will sound.

2. ACTIVATE A FUNCTION

MANUAL

To start the function you have selected, turn the *thermostat knob* to set the temperature you require.

Please note: During cooking you can change the function by turning the *selection knob* or adjust the temperature by turning the *thermostat knob*.

The function will not start if the *thermostat knob* is on 0 °C. You can set the cooking time, cooking end time (only if you set a cooking time) and a timer.

Use \pm or \equiv to change the setting, then press and hold \bigcirc for at least two seconds to confirm.

3. HEAT THE OVEN

A new oven may release odours that have been left behind during manufacturing: This is completely normal.

Before starting to cook food, we therefore recommend heating the oven with it empty in order to remove any possible odours.

Remove any protective cardboard or transparent film from the oven and remove any accessories from inside it.

Heat the oven to 250 °C for about one hour, preferably using the "Maxicooking" function. The oven must be empty during this time. Follow the instructions for setting the function correctly.

Please note: It is advisable to air the room after using the appliance for the first time.

AUTOMATIC

To start the automatic function you have selected ("Bread" or "Pastry"), keep the *thermostat knob* at the position for automatic functions (\bigcirc/A). To finish cooking, turn the *selection knob* to position 0.

Please note: You can set the cooking end time and timer.

RISING

To start the "Rising" function, turn the *thermostat knob* to the relevant symbol; if the oven is set to a different temperature, the function will not start.

Please note: You can set the cooking time, cooking end time (only if you set a cooking time) and a timer.

3. PREHEATING

Once the function starts, an audible signal and a flashing icon for on the display indicate that the preheating phase has been activated. At the end of this phase, an audible signal and the fixed icon for an the display will indicate that the oven has reached the set temperature: at this point, place the food inside and proceed with cooking.

Please note: Placing the food in the oven before preheating has finished may have an adverse effect on the final cooking result.

. PROGRAMMING COOKING

You will need to select a function before you can start programming cooking.

DURATION

Keep pressing O until the O icon and "00:00" start flashing on the display.

Use \pm or \equiv to set the cooking time you require, then press \odot to confirm.

Activate the function by turning the *thermostat knob* to the temperature you require: An audible signal will sound and the display will indicate that cooking is complete.

Please note: To cancel the cooking time you have set, keep pressing O until the O icon starts flashing on the display, then use $\underline{-}$ to reset the cooking time to "00:00". This cooking time includes a preheating phase.

PROGRAMMING THE END COOKING TIME/ DELAYED START

After a cooking time has been set, starting the function can be delayed by programming its end time: press \bigcirc until the \bigoplus icon and the current time start flashing on the display.

Use \pm or \equiv to set the time you want cooking to end and press \bigcirc to confirm.

Activate the function by turning the *thermostat knob* to the temperature you require: the function will remain paused until it starts automatically after the period of time that has been calculated in order for cooking to finish at the time you have set.

Please note: To cancel the setting, switch the oven off by turning the *selection knob* to position "**0**".

END OF COOKING

An audible signal will sound and the display will indicate that the function has finished.

Turn the *selection knob* to select a different function or to position " 0 " to switch the oven off.

Please note: If the timer is active, the display will show "END" alternately with the remaining time.

. SETTING THE TIMER

This option does not interrupt or program cooking but allows you to use the display as a timer, either during while a function is active or when the oven is off.

Keep pressing \bigcirc until the \diamondsuit icon and "00:00" start flashing on the display.

Use \pm or \equiv to set the time you require and press \bigcirc to confirm.

An audible signal will sound once the timer has finished counting down the selected time.

Notes: To cancel the timer, keep pressing O until the O icon starts flashing, then use $_$ to reset the time to "00:00".

AUTOMATIC CLEANING FUNCTION – PYRO

Do not touch the oven during the Pyro cycle.

Keep children and animals away from the oven during and after (until the room has finished airing) running the Pyro cycle.

Remove all accessories from the oven before activating the function. If the oven is installed below a hob, make sure that all the burners or electric hotplates are switched off while running the selfcleaning cycle.

For optimum cleaning results, remove excessive residuals inside the cavity and clean the inner door glass before using the Pyro function. We recommend only running the Pyro function if the appliance contains heavy soiling or gives off bad odours during cooking.

To activate the automatic cleaning function, turn the *selection knob* and the *thermostat knob* to the icon. The function will be activated automatically, the door locked and the light inside the oven switched off: The display will show the time remaining to the end, alternating with "Pyro".

Please note: It is only possible to programme the end time of this function. The duration is automatically set to 120 minutes.

Once the cycle has been completed, the door remains locked until the temperature inside the oven has returned to a safe level. Air the room during and after running the Pyro cycle.

USEFUL TIPS

Www

Download the Use and Care Guide from **www.hotpoint.eu** for more information

HOW TO READ THE COOKING TABLE

The table lists the best function, accessories and level to use to cook various different types of food. Cooking times start from the moment food is placed in the oven, excluding preheating (where required). Cooking temperatures and times are approximate and depend on the amount of food and the type of accessory used. Use the lowest recommended settings to begin with and, if the food is not cooked enough, then switch to higher settings. Use the accessories supplied and preferably dark-coloured metal cake tins and baking trays. You can also use Pyrex or stoneware pans and accessories, but bear in mind that cooking times will be slightly longer.

COOKING DIFFERENT FOODS AT THE SAME TIME

Using the "FORCED AIR" function, you can cook different foods which require the same cooking temperature at the same time (for example: fish and vegetables), using different shelves. Remove the food which requires a shorter cooking time and leave the food which requires a longer cooking time in the oven.

BREAD AUTO FUNCTION

For best results you should carefully follow the instructions, using the recipe for mixing 1000 g of dough: 600 g of flour, 360 g of water, 11 g of salt, 25 g of fresh yeast (or two packets of yeast powder).

For optimal rising, allow about 90 minutes at room temperature or 60 minutes in the oven using the "Proving" function.

Put the dough into the (cold) oven, pour 100 cc of cold drinking water on to the bottom of the oven and activate the "Bread Auto" function. After cooking, leave the dough to stand on a wire shelf until completely cooled.
