8.2. Exposure controls

Eye protection:

Wear safety goggles with side shields (EN 166).

Protection for skin:

Wear work clothes with long sleeves and safety footwear for professional use in category II (refer to Directive 89/686/EEC and standard EN 344). After removing protective clothing, wash affected skin with water and soap.

Protection for hands:

Protect your hands with gloves, category II (Directive 89/686/EEC and EN 374) such as latex, nitrile rubber, butyl rubber PVC or equivalent. For the definitive selection of the material used for the gloves,

the following factors should be considered: degradation, breakage time and permeation. In the case of preparations, glove resistance should be tested before use because it is not foreseeable. The gloves have a durability that depends on the duration of exposure.

Respiratory protection:

If you exceed the threshold value (e.g. TLV-TWA) of one or more of the substances in the mixture, wear a mask with a filter type ABEK. The class (1, 2, 3) must be chosen in relation to the limit concentration of use (EN 141).
